

PRODUCT PROFILE

NEWCASTLE DISEASE VACCINE (B1 TYPE, LASOTA STRAIN, LIVE VIRUS)

DESCRIPTION

Newcastle Disease Vaccine, B1 Type, LaSota Strain, is a monovalent live virus vaccine for the immunization of chickens against Newcastle disease.

COMPOSITION

Live Newcastle disease virus, B1 Type, LaSota Strain

FORMULATION

Lyophilized live virus

TARGET SPECIES

Chickens

INDICATIONS

Newcastle Disease Vaccine, B1 Type, LaSota Strain, is recommended for administration to healthy chickens to help protect against Newcastle disease.

VACCINATION PROGRAM

- For drinking water administration, this vaccine is recommended for the vaccination of healthy layer, breeder or broiler chickens 2 weeks of age or older.
- For spray administration, this vaccine is recommended for the revaccination of healthy layer, breeder or broiler chickens 4 weeks of age or older.
- Dosage: one dose per bird.

METHOD OF ADMINISTRATION

Intranasal or eye drop (intraocular), drinking water or spray:
See the product insert for detailed instructions for vaccine administration by these routes.

WITHHOLDING PERIOD

21 days before slaughter

PRESENTATION

10 x 5,000 doses

STORAGE

Store in the dark at 2°C to 7°C (35°F to 45°F).

PRECAUTIONS

- If possible, vaccinate all susceptible birds on the premises at the same time.
- For 10 to 14 days after vaccinating, avoid carrying vaccine particles on shoes, clothing, etc., into areas where there are unvaccinated birds.
- Use entire contents of vial when first opened.
- Burn vaccine containers and all unused contents.

CONTRAINDICATIONS

None, when used according to label instructions.

WARNINGS

- Newcastle Disease Vaccine virus is capable of causing a mild, irritating eye infection in humans, lasting about three days.
- Do not allow vaccine to contact the eyes.
- Contains gentamicin as a preservative.
